# LAUWERS

# RORO roselifter : indispensable for modern rose nurseries !

## RORO roselifter

Using the LAUWERS RORO rose lifter gives you many benefits. With this machine, you can harvest all your roses in a very short time with a minimum of labour.

Three people are able to lift and tie up to 30.000 roses a day.

The unique shaking system is designed to leave the roots totally free from soil whilst protecting the fine roots from damage.

### EASY-LIFTING

With this machine, saving time is not the only advantage. Harvesting becomes a lot less labour-intensive because the machine is doing all the hard work. All you have to do is sort and tie the roses. This can all be done at the load-bed of the machine. If the machine is equipped with a top cutting knife, the longest branches are cut while being lifted which means that the roses are delivered to the pack-house ready-trimmed.

### SIDE-SHIFT

Thanks to the side-shift you can extend the machine by up to 40 cm. This allows you to start harvesting anywhere in the field or row by row.

### OPTIONAL EXTRAS

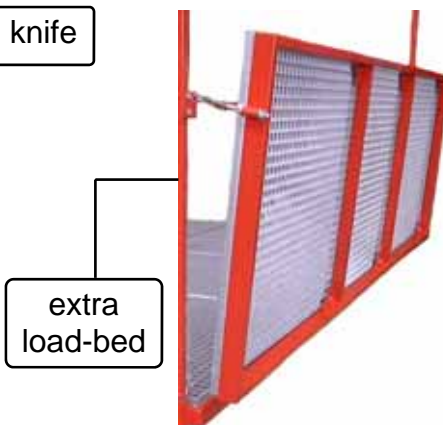

- Top cutting knife, adjustable in height.
- Deleafer : for early season harvesting
- Extra load-bed : useful for long rows
- Rasspe tying machine
